

# Know Your Right to Treatment!

Did you know that the right to treatment with medications for opioid use disorder (MOUD) is protected by the Americans with Disabilities Act (ADA)? Pregnant and postpartum people deserve access to reduce overdose and death.

**It is your right to take MOUD while you are pregnant. This applies to:**

Prisons and jails  
Drug court or probation offices  
Family court

**It is illegal for substance use disorder treatment programs to refuse services to you because you take MOUD.**

**Employers cannot refuse to hire you just for taking MOUD.**

**Know your rights.** Report a potential ADA violation to the assistant U.S. attorney in your district, the federal government, or the Legal Action Center.
